

World Class Monitoring for Trendpoint Meters

Trendpoint and NORLINX Systems have teamed up to provide industry-leading DCIM software at no cost for Trendpoint customers. GSMpowerlite, NORLINX's free DCIM software suite, provides monitoring, alerting and reporting on all Trendpoint meters within any data center environment.

 GSMpowerlite

www.norlinx.com/gsm-powerlite

After a quick and easy download, you will be able to achieve the following, and more, through your free GSMpowerlite software suite:

- Easily begin managing TrendPoint meters through GSMpowerlite's automatic discovery of local networked devices.
- Quickly view power meter data for all TrendPoint meters in a unified, customizable view.
- Generate a variety of live and historical reports for any supported power metrics such as kilowatt-hour, THD, amperage, wattage and volt-amps metrics.
- View aggregated power usage, based on logical groupings, to provide better understanding of load balancing and general distribution of power.
- Receive fast alerts and alarms to potential power issues so can stop them before they are a problem.
